Find your organization's current data status...

...and see how DeepSense can support your artificial intelligence (AI) and machine learning (ML) efforts

Data Maturity

- Can see a strategic application for AI/ML
- Expect capacity for future big data
- Have or expect a robust technology pipeline

- Provide some strategic AI/ML direction
- Introduce academic AI/ML domain expertise
- Explore and identify possible future AI/ML opportunities
- Provide some data considerations
- Help plan for future AI/ML

Data Maturity

- Strategic plans include future use of AI/ML
- Have strong product subject matter expertise
- Expect future capacity to implement ML
- Have some raw and annotated data
- Have a robust technology pipeline

- Provide some strategic AI/ML direction
- Engage academic domain expertise
- Explore possible proof of concept
- Plan for future development

Data Maturity

- Strategic direction requires AI/ML
- Have or expect to have capacity to integrate AI/ML into existing systems
- Have quality raw and annotated data
- Have access to some technology subject matter expertise
- Have a robust technology pipeline

- Provide academic domain expertise
- Design, train/test AI/ML proof of concept, prototype or functional solution
